

## Become a Member Today

With our two wind turbines being built at Leonards Hill the first community scale wind farm in Australia will be producing clean energy around the middle of this year.

It is not too late to be part of this exciting project. With a minimum investment of \$100 locals can be part of our growing community of members who care about improving our environment and who will share in profits from the sale of our clean electricity.

Visit us at our next stall at the Daylesford Farmers Market on Saturday 5 March or visit our website for details [www.hepburnwind.com.au/offer](http://www.hepburnwind.com.au/offer)

## Expression of Interest

### *Landscaping & Horticultural Services*

We are seeking the services of appropriately qualified and experienced landscape gardeners and horticultural specialists to assist in our vegetation activities over the coming year.

Please send us your name and contact details along with a brief overview of your experience to
