

Almost there...

Construction is humming away busily on site. Our turbines have arrived in Victoria and Australia's leading tower fabricator has finished our towers in Portland.

Weather permitting, our turbines should be up before the end of the month. It will take around three months to fully commission the wind farm, and then we'll be generating 100% clean power into the local electricity network.

It's not too late to join.

Locals can join Hepburn Wind starting from just \$100. A membership entitles you to dividends from the project and the opportunity of being a pioneer in the community energy sector. For details, visit hepburnwind.com.au/offer

Visit us at ChillOut Sunday 13 March.

Hepburn Wind is proud to support the colourful extravaganza that is ChillOut Festival. Stop by our stall on Carnival Day to chat about the local renewable energy movement.

Stay in the loop.

We'd love to keep you in the loop with developments out at Leonards Hill as we move towards generation. You can subscribe to our mailing list at hepburnwind.com.au
