

hepburnwind

Last minute rush!

The phone has been ringing off the hook! Our membership has rocketed up the last few weeks – we are still counting and processing applications. We are constantly energised by our community's vote of confidence and thank our members who have believed in the project over the past six years.

Local power to the grid

At 3pm on 30 June, our power made it all the way to Ballarat for the first time! Commissioning activities are proceeding very well. You may notice the turbines starting and stopping as testing progresses – they are on track to have their 500 hour service sometime in July.

Making our voice heard

We encouraged our supporters to make submissions to the recent Senate Inquiry into the social and economic impact of rural wind farms. More than 1,100 Hepburn Wind supporters responded, representing 56% of submissions received. Intrigued by our model, we were privileged to have five senators visit and experience first hand what our community has achieved.

Did you know?

A detailed study of our wind data is freely available on our website. We are now working on a technical solution that will enable us to publish energy production on our website. You'll see more information out of our wind farm than any other in the country. Any questions? Just ask!

Yes, you can still join...

Our share price is now \$1.10 per share. Locals can join from \$110. See hepburnwind.com.au/join, email info@hepburnwind.com.au, or pick up the phone and call us on 5348 6760.
