

Support for Community Renewable Energy is Soaring

Since Hepburn Wind announced the signing of our turn-key construction contract with REpower Systems to build two wind turbines at Leonards Hill (near Daylesford), interest in our project has skyrocketed.

In the six weeks since:

- more than 455 copies of our revised offer have been downloaded from our website
- our website traffic has doubled
- we've received \$232,000 in additional investments
- we're adding an average of 10 new members a week
- we've outlaid over \$7.5m in advance payments for the construction phase.

Who says most Australians don't care about climate change?

If you are now one of our members - thank you for your support. But if you registered your interest in our project because you want to see a constructive response to the threat of climate change, but haven't taken the leap yet, time is running out.

Become a member of Hepburn Wind today and help us implement a new model for a low carbon future in Australia. By investing together we're able to make a bigger impact than investing alone: an investment in Hepburn Wind will generate four times more energy than the same investment in rooftop solar PV panels.

REpower Systems has begun detailed design of the wind farm and works are scheduled to begin on site in October. The two turbines are expected to be operational by this time next year. Expert analysis of our wind farm predicts that on average we'll prevent the release of 12,200 tonnes of CO₂ into the atmosphere each year. That's equivalent to 2300 homes - more than there are in Daylesford.

We're not waiting for the government to take courageous steps - we're "going it alone". Join in with our community of 1160+ members and help us show that the transition to a low carbon future is easy and can begin now.

Hepburn Wind shares are available to those outside the local community until the end of June in minimum parcels of just \$1000. For those within our local area minimum parcels are \$100. The updated Membership and Share Offer can be downloaded from our website www.hepburnwind.com.au.

Become a member of Hepburn Wind today, invest in our project, and help secure our environment's future as well as your own.
