Sustainable Hepburn Association – Renewing the Earth proudly presents

Rod Quantock – Bigger the Polar Bears, This is Serious!

Rod Quantock says, “If climate change doesn’t scare you shitless, then you just don’t get the science.”

Fortunately Rod does get the science. And when he gives you his take on the physics, chemistry, biology, geology, paleontology, cosmology and meteorology of climate science you’ll get it too. And then... you’ll be scared shitless!

“There is plenty to laugh at here, and even more to take away. You’ll learn some great tips for rebuttal when it comes to the deniers and the do-nothings. Rod says everything you want to say. Everything you want to scream. He’s right, but his show is more than just catharsis for greenies. Much more.”

Australian Stage It’s time to take climate sides! And if you don’t know what side to be on you owe it to yourself to see Bigger the polar bears, this is serious - perhaps arguably the most important show in what’s left of human history.

When: 7.00 pm Friday 25th June
